## DIFFERENT COMPENSATION OPTIONS

A stable, efficient, value-added system.

# START BONUS

The first step towards accomplishing your dreams

After each new entrant in your network, (registered by you or your partners), you will receive a commission of 20 to 58%, depending on your qualification.

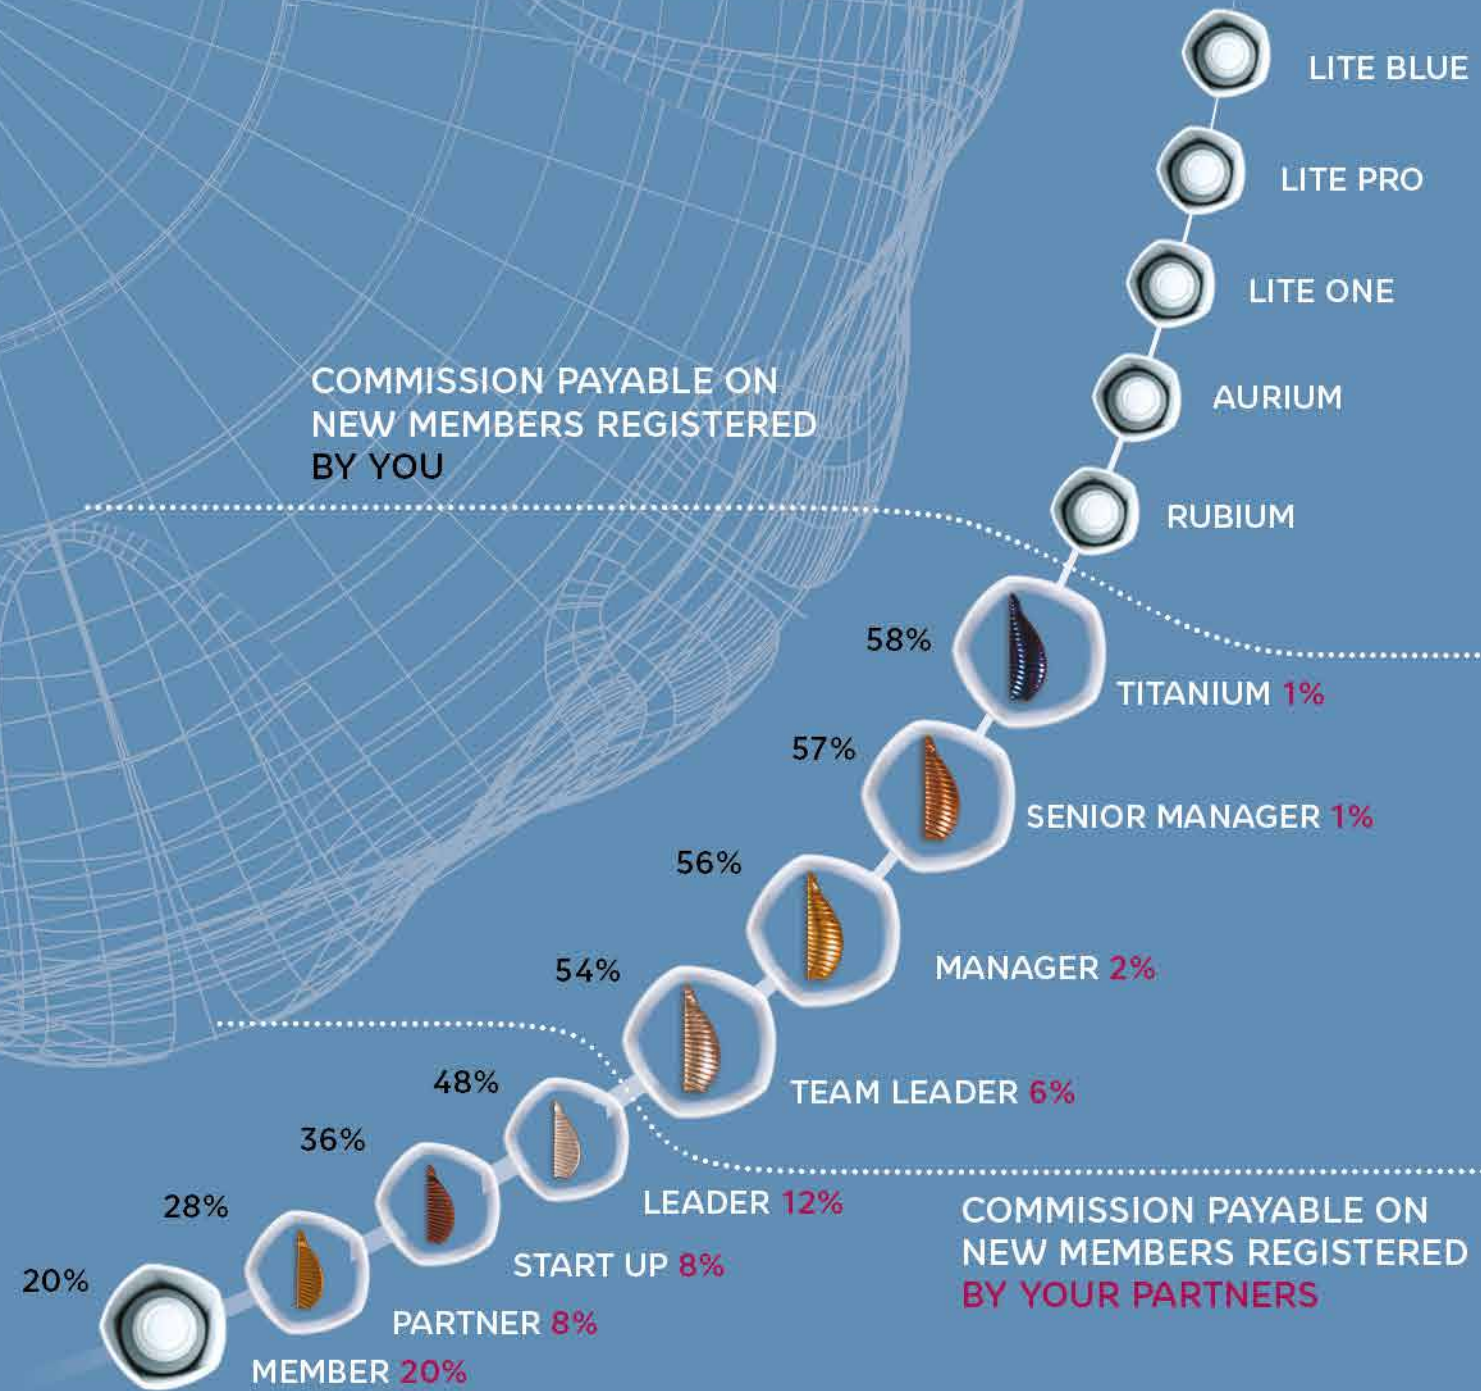

You are entitled to a differential commission on new entrants registered in your network.

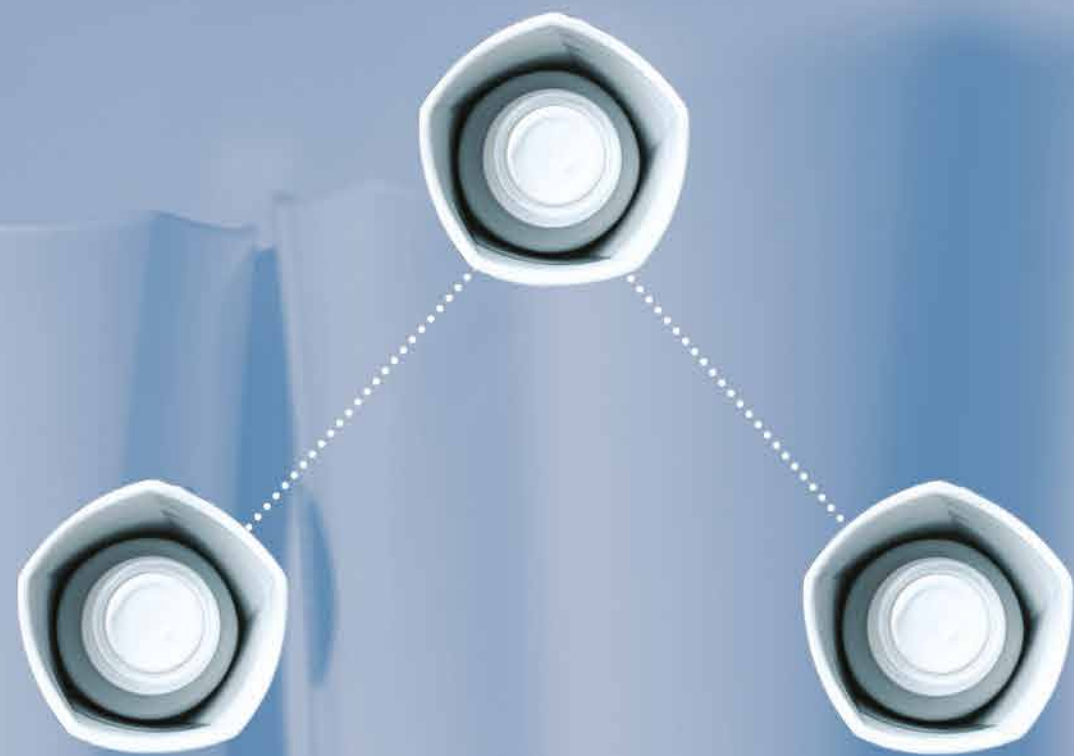

(calculated as the variance between the commission at your qualification level and that of the new entrant's, at the first purchase).

You can receive a share of the Start Bonus if you have an active membership corresponding to your career level.

If there is no activity, your commission will constitute part of the Matching Bonus.

## BINARY BONUS

Long-term predictability and stability.

It is a condition for the payment of the bonus element that there should be activity that is worth at least 80 PVs and one directly registered active member on both sides.
