

- LAVYLITES -

The first vibrational Cosmetics

In 2013, Tibor Jakobovic opened a new cosmetics sector, Lavylites, which combines traditional knowledge of nature with innovative information technology. The first consciousness and vibration cosmetics have a preventive, regenerative and an anti-pandemic effect on the cells and are years ahead of today's standards.

Lavylites is a gift for people of any age, animals and plants. It reminds the cells of the original biological state, increases cellular energy, strengthens vitality and zest of life and activates self-healing powers.

It is a holistic concept for body, mind and soul consisting of 5 different product ranges (Lavyl, Solvyl, Exyol, Heavyl, Pentyll), which interlock and support each other. The ranges include sprays, creams and dietary supplements for daily use.

The essences consist 100% natural ingredients such as medicinal plants, crystals, Schüssler salts, minerals and colloidal metals. The combination of active ingredients provides the cell with over 3000 pieces of information within seconds (patented mode of action).

Thanks to daily use, the pineal gland can be decalcified. You can lead a healthy, contented life into old age on your own, with more zest for life, more inner balance, more vitality, more charisma, a younger appearance and more awareness of intuition.

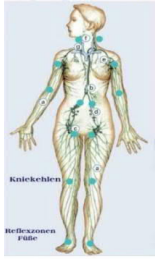

Legal Disclaimer

Lavylites are EU certified cosmetics.

The products are clinically and dermatologically tested (no animal testing). They are not medical drugs. The company distances itself from any promises of healing. They do not replace the diagnosis or treatment of a doctor or naturopath.

Your sponsor and your team are always happy to answer any questions you may have. The following section outlines the products range and gives an overview of each product, the range of use and how you can apply it.
